

The iridium market out to 2022

Peerless understanding of the iridium market

SFA (Oxford) is the only company in the world to derive iridium mine production and construct detailed demand modelling of all major end-uses.

The Iridium Radar delves into the current market and provides comprehensive analysis, charts and commentary.

It offers an overview of changing technological developments and highlights the underlying evolution of demand and end-use applications.

The study provides a thorough examination of the events and trends impacting the iridium market now and over the next five years.

For full details please contact us.

Key features:

- **Market summary**
- **Price outlook and drivers to 2022**
- **Demand trends and stock estimates**
- **A unique supply and demand market balance**
- **Trade flow analysis**
- **Materials for new energy applications**
- **Supply challenges and mine economics**

The **latest 21 page quarterly report** includes commentary and analysis on:

- The impact of ore body **depletion** and new **replacement projects**.
- Orders for **iridium crucibles** for lithium tantalate single-crystal growth.
- The effects of **smartphones** adopting OLED displays.
